

### Google Assistant

Just say what you want  
Powered by Google AI technology, Google Assistant collects content of the highest quality across all TV Apps and shows them on the Search page.

### Google Play Store

More play, faster play, better play

A huge choice of apps from Google Play Store. You can find as many global popular apps and local apps as you want.

### Home Control

Creating your smart life  
With the addition of IOT technology, television becomes the home control center. All the household appliances in your home will be controlled by voice.

### Google Chromecast

Sharing on a bigger screen  
Easily cast movies, shows, and photos from your device to the TV. Send a command to TV, it will search the Internet to play the casted programs by itself.

## Customized Command

### One Word to Control All

SKYWORTH AI TV supports customized command so that you can control TV and home devices at your will. You can change channel, turn on the light and open curtain at the same time. Just say a word, you can control them all.

Beyond the unexpected with AIOT

# SeeSpectacular

Dolby Vision HDR brings extraordinary color, contrast, and brightness to the TV screen, providing a cinematic viewing experience at home. Thanks to the cutting-edge visual technology, the color palette and contrast range are dramatically expanded. Such dynamic metadata then optimizes the picture frame by frame, ushers in a whole new standard for image quality.

# Dolby Audio | DTS Trusurround

## The Best of Both Worlds

Enjoy the best of both worlds by adopting the two top audio technologies in the industry. Dolby Audio and DTS TruSurround will deliver rich, clear, powerful sound.

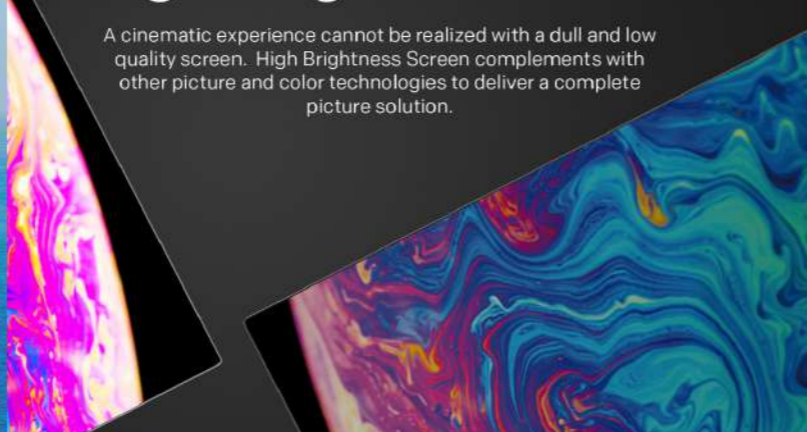

## Infinity Screen

Minimized border, maximized vision. The pursuit of maximum visual enjoyment brings you a minimalistic design as well as a real immersive experience.

## High Brightness Screen

A cinematic experience cannot be realized with a dull and low quality screen. High Brightness Screen complements with other picture and color technologies to deliver a complete picture solution.

## Delicate Picture Enhancement

Trochilus Extreme is SKYWORTH's proprietary picture engine for delicate picture enhancement. It makes use of AI technology to detect, recognize and reconstruct individual images precisely to reproduce the best picture quality.

Trochilus Extreme

## Pure HDR

The pixel quality improvement technology has higher color depth, wider dynamic range and stronger color expression to perform more colorful and vivid picture.

Pure HDR

Without Pure HDR

## Eye Protection

Blue-light hazard may cause retinal injury, myopia, cataract and other eye diseases. The special filter can minimize the harm caused by blue-light hazard to protect our eyes.

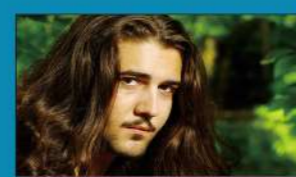

### Contrast Booster

Contrast Booster can automatically adjust contrast ratio based on the light and shade of video content. It further enhances the light of the bright part and makes the details of the picture clear.

### Skin Color Adjustment

There are many kinds of skin tone in the world. Skin Color Adjustment can intelligently handle skin color through multiple registers, so as to make the skin tone in the picture more real and natural.

### Color Compensation

SKYWORTH has devoted to deliver clarity on color precision for a cinematic viewing experience. Color Compensation makes precise color division, and then carry out color compensation an adjustment to realize distinctive color differentiation.

### Precision Definition

To tackle the blurry images, the traditional method is to trace the outline of objects to make them look clearer. But the white edges are irritated to eyes and make the objects look artificial. Precision Definition works differently to enhance definition of overall picture and sharpen the edges and lines.
